

The Sidekick Suite™ Solution

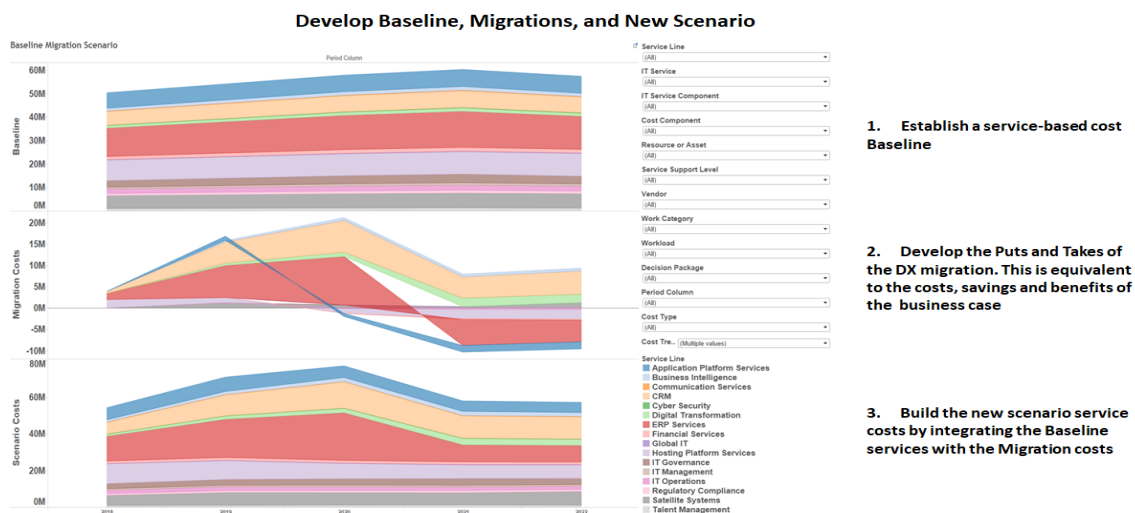

Develop the financial models to underpin your company's digital transformation

- Define the various scenarios to migrate to new platforms
- Develop a five-year financial model as the basis for decisions
- Communicate to senior management the business case: costs, risks, value
- Measure the realization of the plan with KPIs and benefit realization

Provide insights to compare options and support management decisions

Develop and drill into the new service-based costs curves

CIO Sidekick™
IT Product Manager Sidekick™
Business/IT Architecture Sidekick™
IT Financial Analyst Sidekick™

Sidekick Suite is an in-depth financial modeling tool that is focused on supporting the Information needs of 4 key personas by mashing disparate data into an integrated and customized model designed to support key decision making.

CIO Sidekick: KPIs, major transformation initiatives, demonstrate IT value
Product Manager Sidekick: ITFM service-based TCO cost model, Showback
Business Architect Sidekick: Business architecture integrated with IT capabilities
IT Financial Analyst Sidekick: ROI, Scenario Modeling, Business Case, options

Sidekick Suite acts as a trusted 'data-driven advisor' to the IT management team.
